55 Americans Die After Receiving the Covid-19 Vaccine

Many people have died shortly after receiving the first dose of the Covid-19 vaccine.

In Norway, 29 people over the age of 75 have passed away after receiving the vaccine. Most of those who passed, also experienced severe side effects from the vaccine like nausea and vomiting, fever, and reactions at the injection site.

Norway has since suggested that the vaccine may be too risky for those who are very old and terminally ill.

> *Pfizer and BioNTech are working with the Norwegian regulator to investigate the deaths in Norway, Pfizer said in an e-mailed statement.* ***The agency found that 'the number of incidents so far is not alarming, and in line with expectations,'*** *Pfizer said.*

Additionally, 55 Americans have died since receiving the first dose of the vaccine. Another 10 people have died in Germany after receiving the vaccine. People have died anywhere from one to four days after receiving the vaccine.

In addition to the sudden deaths after the vaccine, there have been a high number of adverse reactions.
