# FDA Approves Emergency Authorization of Pfizer Vaccine for Children 5-11

On Friday, October 29th the FDA approved the Pfizer Covid-19 vaccine for emergency authorization for children ages 5-11.

The long-term risks to children are not known in an emergency authorization trial.

Children receiving the vaccine will get two shots three weeks apart with a lower dose of the vaccine than those 12 and older.

> *“We’re never gonna learn about how safe the vaccine is until we start giving it.”*
