Green Parody

These are a few of our favorite videos that parady green issues

You probably have already seen at least a couple of these, but we figured any treehugger would enjoy seeing them again.

This green parody, Coal, by Free Love Reform was done so well some people didn’t realize it was a commercial until the last few seconds.

Another great green parody by Free Love Reform, Pizza Dabbers.

When this BP Spills Coffee video came out in June, it would have been too soon to laugh if this green parody video by UCBComedy.com wasn’t so damn funny!

This Grocery Store Wars video was an instant classic created by the brilliant minds at FreeRange Studios.

Another one of the greats by FreeRange Studios . This one is about factory farming. Check out their continuation of this story as well, The Meatrix II and The Meatrix II ½.

If you know of any more we should add please leave us a comment and let us know.
