Human Revolution…GMO Right 2 Know Yes on Labeling Tour!

Our good friend, Jason Taylor of The Source Project, is here in the US and he is traveling with Human Revolution.

Jason uses his video camera to document the truths behind our food supply. His work takes him from his home in the UK to the palm fields of Uganda and the shores of Goa. He tells the story of the farmers, the fishermen, and the real people who are being affected by corporate greed, environmental destruction and industrialized agriculture.

Human Revolution is a political rocker who is using music as a medium to spread the word about the unjust, unhealthy, and unlawful practices behind GMOs. His latest tour is titled, GMO Right 2 Know Yes on Labeling Tour! The goal of the tour is to raise awareness and educate people about the dangers GMO's pose to both consumer health and to farmers and get the word out to voters in California to vote YES on labeling this November! Human's California tour is sponsored by Dr. Bronners Magic Soap.

We're going to be following The Human Revolution here on OLM through Jason's lens. Keep an eye on our blog and facebook page to see what The Human Revolution is up to and help spread the word by sharing the videos, photos, and blog posts with your friends! Let's help Jason and Human get GMOs labeled in the state of California and throughout the world.

Click here for The Human Revolution tour schedule.

Visit Jason Taylor's website to see all of his work.

Recommended Supplements (These supplements help detoxify

GMOs):

- Shillington’s Total Nutrition Formula
