Pfizer Scientists Say Natural Immunity is Better

Project Veritas has released a series of videos from its Covid vaccine investigative series exposing Pfizer officials who said that Coronavirus antibodies lead to equal if not better protection against the virus than the vaccine.

Nick Karl, a Pfizer scientist says natural immunity, from someone who catches Covid-19 and then develops antibodies, is likely better than the vaccine.

> *When somebody is naturally immune – like they got COVID – they probably have more antibodies against the virus … When you actually get the virus, you're going to start producing antibodies against multiple pieces of the virus … So, your antibodies are probably better at that point than the [COVID] vaccination,*
>
> *Pfizer Scientists: 'Your [COVID] Antibodies Are Better Than The [Pfizer] Vaccination.'*

Another Pfizer official Chris Croce supported this statement by saying that someone with natural antibodies is likely protected for longer because there was a natural response in the body.
